RE: Stormwater Pollution Prevention Program Survey

Dear Stakeholder in Stormwater Quality,

I am writing in regards to the City's Stormwater Pollution Prevention Program (SWPPP). The City is required to be permitted by the Federal and State governments allowing us to discharge clean stormwater to waters of the state. This is a five year permit which requires us to have a Public Education component concerning stormwater quality. As part of this component I have attached a short stormwater survey. The survey will enable us to gage the overall knowledge of our City concerning stormwater and allow us to focus our educational efforts according to survey results. Please take a moment to complete the survey and return it in the pre-paid envelope.

I have also attached ten helpful hints that we, as homeowners, can use to improve the quality of water runoff from our properties. Remember, stormwater pollution prevention begins with you and we all have a stake in clean water for drinking, swimming and fishing!

For more information about our Stormwater Pollution Prevention Program, informational brochures and other water quality information please visit the City website at;
<http://www.faribault.org/departments/publicworks/stormwater>

If you have any questions you can also contact me by e-mail at akordiak@ci.faribault.mn.us or by telephone at 507-333-0369.

Sincerely,

Adam Kordiak
City of Faribault
