

Request for Council Action

TO: Mayor and City Council
THROUGH: Tim Murray, City Administrator
FROM: Thomas Rouchka, IT Coordinator
MEETING DATE: July 28, 2020
SUBJECT: Approve 2020 CIP Purchase of Camera Server Infrastructure

Background:

The approved 2020 Budget and Capital Improvement Plan budgeted for the replacement of the City of Faribault Server Infrastructure. The current Server infrastructure for the cameras around the city is severely limited in management and underperforming due to its lack of storage centralization.

The City sought a quote from Fette Electronics, our current camera solutions vendor. Fette Electronics has installed their products expansively throughout City locations and a change to a different vendor would require a complete refresh of all cameras in addition to a camera server. The City received a quote of \$12,681 for their centralized camera center solution. The quote includes services for installation and server equipment.

Recommendation:

Approve the quote from Fette Electronics for the 2020 CIP purchase of updating camera server infrastructure
