

Task Force Memorandum

TO: Viaduct Area Park Improvements Planning Task Force
FROM: Tim Murray, City Administrator
MEETING DATE: June 24, 2021
SUBJECT: Review Concept Layout Sketches

Discussion:

Based upon the input and direction received at the May 20, 2021 Task Force meeting, staff has developed several concept layout sketches to be reviewed at this meeting. The layouts that will be reviewed include the large, primary features to show possible locations, orientations, and relations for the major elements. Note that a final layout plan will include a number of other minor items, such as bicycle racks, benches, area landscaping, etc. Those features will be incorporated at appropriate locations once the layout of the large components has been determined.

The concept sketches will be completed and distributed to members of the task force 2 – 3 days prior to the meeting (we will also post them to the City's website under the agenda center). It is hoped that the group will be able to reach a consensus on the preferred layout, so then staff can work to develop a final layout (with additional items incorporated) and then start preparing an initial cost estimate for the improvements.
