

## Request for Council Action

**TO:** Mayor and City Council  
**THROUGH:** Tim Murray, City Administrator  
**FROM:** Mark DuChene, City Engineer  
**MEETING DATE:** August 13, 2019  
**SUBJECT:** Approve Professional Services Contract for Materials Testing Services for the 30<sup>th</sup> Street NW Reconstruction Project – City Contract 2019-06

---

### **Background:**

Due to the scope and nature of the 30<sup>th</sup> Street NW Reconstruction Project, Contract 2019-06, the City needs to utilize the services of a professional engineering and testing company to complete materials testing and certification of materials used in the project. City staff solicited a quote from American Engineering & Testing, Inc. since they are the firm providing similar services for the TH 60 project and will be able to coordinate trips to town for two projects simultaneously which should result in cost savings and ease for staff only having to coordinate with one firm for the two projects.

### **Recommendation:**

Accept Professional Engineering Services Proposals from American Engineering and Testing, Inc.
