

Council Committee Memorandum

TO: Joint Council Committee
THROUGH: Tim Murray, City Administrator
FROM: Mark DuChene, City Engineer
MEETING DATE: March 4, 2020
SUBJECT: Library Parking Lot Layout

Discussion:

Attached is a draft of the revised preliminary layout for the reconstruction of the parking lot on the east side of the library. The attached layout, in conjunction with the planned Division Street reconstruction project, increases the available public on- and off-street parking from 104 to 119 (net gain of 15) when compared to the available public parking prior to the Hillside Apartment project. The proposed parking lot layout and parking counts also factor in the proposed library plaza concept.

At this time it is proposed to bid the reconstruction of the east library parking lot as part of the Division Street and Central Avenue reconstruction project which were included in the 2020 budget. Staff is requesting any feedback the Council has on the proposed east library parking lot layout.
